

Major Version 2025.1.1

Changes between [2024.12.2](#) and [2025.1.1](#)

Change copyright

In the new version, the copyright has been updated to include 2025.

Warn System

- Now, when a user is timed out with the AntiSpam Module, they automatically receive a warning.
 - Now, when a user is timed out with the PunishPub Module, they also automatically receive a warning.
 - When breaking the Piconly module's rules, a warning is now given.
-

Channel Module Fixes

Leave messages are now correctly fixed; you can finally use custom leave messages.

New HybridCommands (prefix side) Parser

You can now reply to a user's message, making the first "user" option of the command target the replied user.

MemberCount Revamped

- Added "VoiceCount" variable to show the number of members in voice channels on the server.
 - Channels are now automatically updated every 5 minutes.
-

Economy Module

- Time spent in voice channels can now earn you money.
 - Customizable cooldown between rob and work actions.
 - Created a command to sell roles in an economy shop.
 - Changed the aesthetics of the economy leaderboard.
-

New Module: NickKicker

You can now kick new members who join your server if their global name, display name, or username contains specific words or characters.

Modifying the RankModule

- Now, if a member modifies their display name/global name and removes the mention of your guild, their role is automatically removed.
-

Translation Fixes

- Fixed new custom channel names (with the TempVoice module).
-

New Ticket Panel

- A new, fully customizable ticket panel is available with `/ticket panel`.
-

Change to Permission System

- You can now add specific roles or specific users for command permissions.
 - New embed aesthetics.
-

Backup Command Modified

- Now shows a confirmation message before loading a backup into the guild.
-

Create Commands

- `zip-stickers`: Creates a zip of all the guild's stickers.
 - `zip-emojis`: Creates a zip of all the guild's emojis.
 - `h`: Creates a new help embed for all prefix commands.
 - `meme1`, `meme2`, `meme3`: Meme generators.
 - Added `/ticket rename` command.
-

Bug Fixes

- Fixed Nitro display on `/userinfo`.
 - Fixed the display of offline members in the "vc" command.
 - Fixed Automod bypass.
 - Added specific regex to allow other links besides Discord server invitations.
-
