

Minor Version 2024.12.2

Changes between [2024.12.1](#) and [2024.12.2](#)

Fix for Prefixed Command Execution Error

Behavior in 2024.12.1:

When a user executed a hybrid command in message mode using the full command format (group part + subcommand part), e.g., `+gw create`, it worked.

However, if the subcommand part didn't exist in the bot, it returned a "Missing argument" error.

Behavior in 2024.12.2:

Now, when a user uses a hybrid command in message mode with the full command format but the subcommand part is invalid, the bot will send a help embed listing all commands in the corresponding category.

Fix for Embed Command Replacement Error

Behavior in 2024.12.1:

When a user replaced an existing embed using the `/embed` command, attached files were not updated.

Behavior in 2024.12.2:

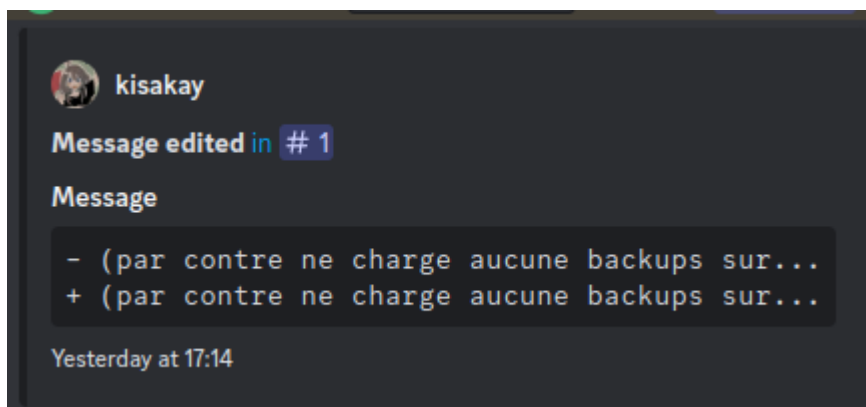

The `/embed` command now correctly updates attached files in the message.

New Module Added: Autoreact

The Autoreact module allows the bot to react with specific emojis in a defined channel.

Improvement of "Message Edit" Log Message

Behavior in 2024.12.1:

Behavior in 2024.12.2:

Bug Fixes in the MemberCount Module

The MemberCount module exhibited strange behavior. The text channel name is no longer converted to lowercase.

Added RankRole System

Server administrators can now configure rewards for active members. They can assign roles based on levels achieved in the server's rank module.

Added RoleSelect Module

Complementing existing modules like RoleReaction (assign roles via reactions) and RoleButton (assign roles via buttons), a new module called "RoleSelect" has been created. It allows fully configurable role selectors via dropdown menus (SelectMenu) with roles, emojis, titles, descriptions, etc.

"Hack" Command Update

For security reasons, the generated IPv4 addresses are now entirely fictitious.

"Ranks Leaderboard" Command Update

Behavior in 2024.12.1:

**Kisakay** used **🔖 ranks leaderboard**

Behavior in 2024.12.2:

Various Bug Fixes for the /schedule Command

Update to the Image Generated by the Stats Module

Renaming "botid" to "bot_code" in OWNIHRZ Admin Commands

To avoid confusion between the bot's Discord user ID and its unique code, the options have been renamed.

New Help Menu for Hybrid Commands in Message Mode
