

Minor Version 2025.2.0 (February 1st, 2025)

Changes between 2025.1.1 and 2025.2.0

Moderation System

- The `/mod kick` command now displays an error message if the bot doesn't have the required permissions to kick the user from the server.
 - Added an option to include a reason in the `/mod tempmute` command
 - Created the `/mod baninfo` command
 - Created the `/mod banlist` command
-

Temporary Voice Channel System

- The name of the created temporary voice channel is now translated
-

Bot Language Content

- English and French translations have been reviewed by several contributors for grammatical corrections.
 - Changed the command name from `/setserverlang` to `/setlang`
-

Utility Commands System

- The `/utils leash` command has been translated
 - Created the `/utils wakeup` command, which allows moving a server member to random voice channels in a loop to wake them up
 - The `/utils autoreact` command can now be configured for multiple emojis in a text channel
 - Created a `/utils autorenew` command. This command allows automatic renewal of a text channel after a given time
 - Fixed the `/utils vc` command which displayed an incorrect number of online members in a voice channel
 - Created the `/util where` command which allows you to know where a server member is connected in voice
 - Created the `/util serverpic` command
 - Created the `/util allwebhooks` command
 - Created the `/util unzip-emojis` command
-

"MemberCount" Counter System

- Added the "{OnlineCount}" variable which indicates the number of online members on the server
-

New Custom Tag System

- Created a complete category of new commands under the `/tag` slash group, which allows using pre-created messages and using them on the fly
-

PFPS System

- Translation of buttons and embed
 - Fixed a bug that sometimes caused chains of combos from the same user
-

Global Blacklist System

- From now on, iHorizon blacklists are not functional for servers with more than 500 members
-

Ticket Systems

- Fixed commands: `/ticket close`, `/ticket delete`, `/ticket add-member`, `/ticket remove-member` which failed when the user is not a server administrator.
-

Member Restoration System with oauth2 (RestoreCord Module)

- Fixed the API that wasn't working correctly during a forced join on a new server
-

Logs System

- Changed the command name from `/set logschannel` to `/set logs`
-
