

Version Patch 2026.5.1 (1st patch of May 2026)

Changes between [2026.4.1](#) and [2026.5.1](#)

User-facing changes

NEW MODULE: LastFM Scrobbler

- Connect your Last.fm account and automatically scrobble the tracks played by iHorizon while you stay in the voice channel.

NEW MODULE: Sticky

- Keep an important message always visible in your channels with automatic reposting. Embeds, just text or both, you choose!

NEW MODULE: Honeypot

- Only one command: `/honeypot config`
- Set up a trap channel to catch compromised accounts and automatically clean up recent spam across your server.
- Inspired by [RiskyMH's Honeypot bot](#), check it out!

The PicOnly module is now called MediaOnly

- The MediaOnly module now supports sending other types of media than only photos, videos can now be sent in channels where the module is enabled.
- The dropdown menu of the bot's help command has new updated icons for each command category.

New command: `/music clear-queue`

- You can now clear the music queue present in the server where the command is executed.

New command: `/automod block telegram_link`

- You can now use Discord's built-in AutoMod to block Telegram links across your server.

New command: `/music clear-queue`

- *You can now clear the music queue present in the guild where the command is executed.*
- *Fixing the ticket panel module that was broken due to duplicate `optionFields`.*
- *Schedule module fixes*
- *Fixing ghost temporary voice channel in the Temporary Voice Channel module*
- *iHorizon's RPC presence has been modified. It will be now displayed as `PLAYING Shards #[CLIENT_SHARD_ID] | [SERVER_COUNT] Servers | www.ihorizon.org`*
- *Improved translations and wording*
- Modules relying on `HTML2PNG` (e.g. `/love` and `/stats` commands) have been fixed

Internal improvements

- Improved `EmojiManager`
- Centralize `HTML2PNG` rendering in `ShardManager`
- Added `dev` script in `package.json` to launch the bot for development purposes
- Updated dependencies
