

Version Minor 2026.6.1 (1st patch of June 2026)

Changes between [2026.5.1](#) and [2026.6.1](#)

User-facing changes

New command: `/music trackinfo`

- You can now search for a track and instantly display its artwork, link and lyrics in a dedicated embed.

New command: `/music volume`

- You can now change the player volume directly from the music command, with predefined volume levels.

New owner command: `/commandlimit`

- You can now configure per-command rate limits for your guild, including setting, listing and resetting limits.

New command: `/derogation`

- You can now create derogation entries through a dedicated utility command.
- The music player now starts at 60% volume by default.
- The `/music clear-queue` command now also supports the `clearqueue` alias.
- The economy shop now restores previously owned roles when needed.
- The `!balance-add` command now targets the correct argument when selecting a user.
- The wake up command has been reduced from 5 minutes to 2 minutes and now handles move failures more safely.
- The Temporary Voice Channel cleanup has been improved to better remove empty owned channels and avoid deleting channels when a member was only moved.
- The ticket panel has been heavily reworked, including fixes for forms and overall ticket panel behavior.
- The moderation clear command has been reworked and refined.
- The top-messages stats command now updates its progress message correctly when there is no data and when the generated image is sent.
- Regex handling related to the ready status and Discord invite AutoMod detection has been fixed.

New owner command: `/freeze`

- *This command aim to freeze a voice channel, server members who's try to joining the channel will be disconnected.*

New owner command: */unfreeze*

- *Permit to remove the current freeze status on a voice channel.*

New owner command: */talk*

- *Make everyone on a specific voice channel muted.*

New owner command: */untalk*

- *Remove the talk mode from a voice channel already set up.*

Internal improvements

- Improved giveaway management for sharded environments.
- Exported shared music helpers for reuse in the new track information flow.
- Added translation entries and typings required by the new music, command limit and derogation features.
- Fixed the giveaway end command
- Migrating the server backups and giveaways from files to production database

Bug fixes

Avatar command

- *Now, users where are not in the guild will show avatar, not fallback to the author of the command._*

Clear command

- *Clear command got fixed*

New features

- Anti-Binary, avoid user to sending binaries into your discord server (zip, exe, apk, msi, etc)
